

Think Green.®

Simi Valley Landfill and Recycling Center

Looking Ahead

Dear Friends,

We are excited to share some news about our plans for the future.

In the coming months, the Ventura County Planning Department will release a draft Environmental Impact Report (EIR) for everyone to review. This document includes detailed information about our plans at the Simi Valley Landfill and Recycling Center.

We hope you get a chance to review the EIR during the 45-day public comment period. Also, in order to make sure that you have all the facts, we will work with the County to ensure that copies of the EIR are available at County offices, local libraries and our website.

Here are some ways you can get involved and show your support:

- Send a letter of support to your Ventura County District Board of Supervisor at www.countyofventura.org
- Take a landfill tour for an up-close look at the project
- Review the project information online on our website (click on "Modernization/Expansion")
- Attend a public meeting, once the dates of the meetings are announced
- Register your support on our website and join our online community at www.KeepingVenturaCountyClean.com

Our plans for the future will increase green energy programs and help meet the disposal and recycling needs of residents and businesses now and into the future.

For more information about our project or to take a landfill tour, visit www.KeepingVenturaCountyClean.com/expansion.html or contact Lisa Hemenway at (805) 581-1746.

Best,

Mike Smith
Director of Operations

Scott Tignac
Landfill District Manager

Community Benefits

Why the Modernization and Expansion Project is good for the community.

Maintains more than 275 good-paying jobs in Ventura County

Injects more than \$48 million annually into the Ventura County economy

Contributes more than \$3.6 million to public agency budgets within Ventura County

Improves recycling options and increases environmentally-friendly programs

Increases production of enough green energy to power 6,250 local homes

Establishes one of the first LEED facilities at a landfill in the county by using recycled and sustainable building materials, energy-efficient lighting, green energy programs and recycled water

Reduces truck traffic on the Madera Corridor by moving local trucking operations to landfill

Creates over 500 acres for open space and wildlife habitats

Provides charitable contributions including annual sponsorships, service donations and employee volunteer support
